ISTA/P – How to import an enabling code (FSC)

Prerequisites

- ZIP archive file with:
 - release code (FSC) file (.xml) e.g., FZ38042_00020001.xml
 - certificate file (.der) e.g., FZ38042_00020001.der
- Media to copy the files on
 - USB stick (recommended)
 - CD-ROM media and CD/DVD burner
 - Floppy disc

ISTA/P – How to import an enabling code (FSC)

Important Notes

- 1. This import function neither writes the code to the vehicle nor activates the associated function in the vehicle. The activation will be requested during the measures plan realization.
- 2. When using a USB stick ensure, that it's formatted as a removable disc (usually default format). Otherwise the stick will not be recognized by ISTA/P.
- 3. The FSC file (.xml) <u>AND</u> the certificate file (.der) need to be extracted on the media. Do not copy the ZIP archive file on the media.
